FITRAH

COMPLETE WEBSITE PROJECT PLAN

Beard is not a trend. It is a Sunnah.

داڑھی فیشن نہی، سنت ہے۔

PROJECT	Fitrah — Beard Oil & Islamic Awareness
CLIENT	Fitrah PK (fitrahpk.co)
TYPE	E-Commerce + Islamic Awareness Website
STACK	HTML5, CSS3, Vanilla JavaScript (ES6+)
PAGES	Homepage, Shop, Blog, Terms, Auth, Admin Panel
LANGUAGES	English, Urdu, Arabic — Trilingual
THEME	Old Money Islamic — Minimal & Classic
VERSION	1.0 — April 2026

01 — DESIGN SYSTEM

COLOR PALETTE

Role	Name	Hex Code	Usage
Primary Background	Charcoal Black	#0e0d0b	Background, navbar, footer
Primary Text	Warm Cream	#f0ece4	Body text, headings
Accent	Antique Gold	#b8955a	Borders, icons, highlights
Surface	Dark Gray	#1a1917	Cards, panels, tables
Product Accent 1	Olive Green	#3d4a2e	Shaghaf product label
Product Accent 2	Slate Blue	#2e3d4a	Muhafiz product label
Product Accent 3	Pure Black	#0a0a0a	Qawwam product label
Product Accent 4	Off White	#faf8f4	Ro'ab product label
Product Accent 5	Beige Cream	#e8dcc8	Ad'Dawa product label

TYPOGRAPHY

Font Family	Use Case	Source
Cormorant Garamond	Display, headings, hero text, body	Google Fonts
Cinzel	Navigation, labels, uppercase tags	Google Fonts
Noto Naskh Arabic	Arabic text content	Google Fonts
Noto Nastaliq Urdu	Urdu text content	Google Fonts
Courier New	Admin code/data fields	System

ICONS & ASSETS

- Icon Library: Lucide Icons via CDN — vector line icons, no heavy images
- Style: Minimal, thin-stroke, monochrome — gold tint on dark backgrounds
- Product Images: 5 real product bottle photos provided by client
- No stock photography — icon-driven UI throughout all pages
- Brand mark: Fitrah Arabic calligraphy logo (already provided)

LANGUAGE SYSTEM

- Three languages: English (default), Urdu, Arabic
- Language toggle button in navbar — switches all visible text instantly
- RTL layout auto-applied when Arabic or Urdu is selected
- Language preference stored in localStorage — persists on page refresh
- All static text translated in JS data objects (no external service)

02 — PAGES & STRUCTURE

#	Page Name	File	Description
1	Homepage	index.html	Main landing — hero, mission, products, sunnah content, footer
2	Shop / Products	shop.html	5 products grid with filter, detail modal, add to cart
3	Blog Listing	blog.html	All blog posts, category filter, search
4	Blog Post	post.html	Individual article with full content and related posts
5	Terms & Privacy	terms.html	Legal pages — two tab layout (Terms Privacy Policy)
6	Login / Signup	login.html	User auth — admin account pre-seeded in localStorage
7	Admin Panel	admin.html	Full admin dashboard — protected, /admin route guarded

HOMEPAGE — SECTION BREAKDOWN

Section	Description
Announcement Bar	Free shipping notice, promo text — editable from Admin Panel
Sticky Navbar	Logo + Nav links + Cart icon + Language toggle (EN / UR / AR)
Hero Section	Full-screen dark, minimal. Headline in 3 languages. CTA button to Shop
Mission Statement	Brand story — why beard is Sunnah, not fashion. Purpose-driven copy
Products Showcase	5 product cards — horizontal scroll on mobile, grid on desktop
Sunnah Section	Hadith reference with elegant Arabic typography, Islamic awareness
Why Fitrah	6 icon-based benefit cards — natural, halal, pure, effective
Testimonials	3 customer quotes — minimal pull-quote style
Blog Preview	3 latest blog post cards with category tag and read more link
Footer	Logo, navigation links, social icons, language toggle, copyright

PRODUCT PAGE — SECTION BREAKDOWN

- 5 products displayed in responsive grid (3 col desktop, 2 col tablet, 1 col mobile)
- Filter bar: Growth / Hydration / Protection / Healing / Strength
- Each card: Bottle image, Arabic name, English name, tagline, price (PKR), Add to Cart
- Product Detail Modal — opens on click, no page reload
- Modal includes: Full image, Arabic name + meaning, Hadith/Sunnah context, ingredients, size

03 — PRODUCTS CATALOGUE

Product	Arabic Name	Benefit	Label	Tagline
Ro'ab	رُعب	Supports Follicle Growth	White / Clean	Keep Your Ro'ab
Shaghaf	شَيْف	Hydrating & Less Frizz	Olive Green	Fuel Your Passion
Muhafiz	مُحَافِظ	Provides Protection	Slate Blue	Guard Your Honor
Ad'Dawa	الدَّوَاء	Healing & Itch-Free	Beige Cream	Heal Your Nature
Qawwam	قَوَّام	Strengthens Beard	Pure Black	For Alpha Males

04 — ADMIN PANEL

Accessible at: **/admin.html** — Protected by admin credentials only. Normal users and guests are auto-redirected to homepage. Theme matches main website — dark, minimal, old money aesthetic.

1 DASHBOARD

- Total Revenue, Orders, Active Products, Blog Posts — stat cards at top
- Recent orders table with customer name, product, amount, status
- Quick action buttons: Add Product, New Blog, View Orders
- Low stock alerts for products marked as limited

2 PRODUCT MANAGEMENT

- Add new product: name (EN/AR/UR), price (PKR), benefit, full description
- Upload product image URL / file
- Edit and delete existing products
- Stock status toggle: In Stock / Out of Stock
- Visibility toggle: Published / Hidden from shop

- All orders listed with customer name, product, total amount, date
- Order detail view: customer info, delivery address, items, order total
- Status pipeline: Pending → Processing → Shipped → Delivered
- Manual order entry option for phone/WhatsApp orders
- Export orders to CSV format

04 — ADMIN PANEL (Continued)

4 SHIPPING MANAGEMENT

- Define shipping zones by city: Karachi, Lahore, Islamabad, other cities
- Set flat shipping rate per zone (PKR amount)
- Free shipping threshold — e.g. orders above PKR 2,000 ship free
- Estimated delivery days per zone (e.g. Karachi: 1-2 days)
- Toggle Cash on Delivery (COD) on/off

5 COUPON MANAGEMENT

- Create coupon code (alphanumeric, e.g. SUNNAH20)
- Discount type: Percentage (%) or Flat Amount (PKR)
- Set expiry date for time-limited offers
- Usage limit: single use or multi-use
- Active / Inactive toggle — disable without deleting

6 BLOG MANAGEMENT

- Add new blog post: title, content, category, cover image
- Categories: Sunnah, Beard Care, Islamic Lifestyle, Grooming Guide
- Basic rich text editor (bold, italic, headings, lists)
- Publish / Save as Draft toggle
- Edit and delete existing posts
- Language tag per post: EN / UR / AR

7 WEBSITE SETTINGS

- Edit announcement bar text (shown at top of every page)
- Update social media links: Instagram, Facebook, WhatsApp, YouTube
- Update contact info: email, phone number, WhatsApp link
- Edit About Us text displayed on homepage
- Change admin password from settings panel

05 — AUTH & ROUTING LOGIC

URL / Route	Who Can Access	Behavior
/index.html	Everyone	Homepage — fully public
/shop.html	Everyone	Product listing — fully public
/blog.html	Everyone	Blog listing — fully public
/login.html	Guests only	Redirect to homepage if already logged in
/admin.html	Admin only	Admin panel — full access
/admin.html (normal user)	BLOCKED	Auto-redirect to index.html immediately
/admin.html (guest)	BLOCKED	Auto-redirect to login.html

Admin credentials are pre-seeded in localStorage on first site load. Admin email and password are set once and checked on every /admin.html visit. Normal users who manually type /admin in the browser are silently redirected to homepage.

06 — TECHNICAL STACK

Layer	Technology	Version	Purpose
Markup	HTML5	Latest	Page structure, semantic elements, accessibility
Styling	CSS3	Latest	Layout, animations, responsive design, RTL support
Logic	Vanilla JavaScript	ES6+	All interactivity, routing, data management, auth
Icons	Lucide Icons	v0.383	Vector icons via CDN — no image files needed
Fonts	Google Fonts	Latest	Cormorant Garamond, Cinzel, Noto Arabic, Noto Urdu
Storage	localStorage API	Browser	Products, orders, blogs, settings, auth sessions
Routing	JS Hash Routing	Custom	SPA-style navigation without full page reloads
Auth	localStorage + JS	Custom	Admin session management, route guard on /admin
Deployment	Static Hosting	Any	GitHub Pages, Netlify, Vercel, or cPanel

WHY NO BACKEND?

- Zero server cost — runs on any static hosting, including free tiers
- Instant deployment — no database setup or server configuration
- Perfect for launch version — can upgrade to real backend in Phase 2
- Data stored in browser localStorage — persists across sessions
- Future upgrade path: Replace localStorage with Firebase or Supabase seamlessly

07 — FILE STRUCTURE

```
fitrah/
├─ index.html      ← Homepage
├─ shop.html       ← Product Page (Shop)
├─ blog.html       ← Blog Listing Page
├─ post.html       ← Single Blog Post
├─ terms.html      ← Terms & Privacy Policy
├─ login.html      ← Login / Signup Page
├─ admin.html      ← Admin Panel (protected)
├─
├─ css/
│  ├─ style.css    ← Main website styles (shared)
│  └─ admin.css    ← Admin panel specific styles
├─
├─ js/
│  ├─ main.js      ← Core logic, language toggle, init
│  ├─ auth.js      ← Login, session, admin route guard
│  ├─ cart.js      ← Cart, checkout, coupon apply
│  └─ admin.js     ← All admin panel modules logic
```

08 — BUILD ORDER

Phase 1	Design System	CSS variables, fonts, base styles, reset — shared across all pages
Phase 2	Homepage	Hero, mission, products preview, sunnah section, testimonials, footer
Phase 3	Shop Page	Product grid, filter by benefit, product detail modal, add to cart
Phase 4	Auth Pages	Login, signup, session management, admin route guard on / admin
Phase 5	Admin Panel	Dashboard + all 7 management modules (products, orders, shipping, coupons, blogs, settings)
Phase 6	Blog Pages	Blog listing page + single post page with category system
Phase 7	Terms & Privacy	Static legal content page — two tabs (Terms Privacy Policy)
Phase 8	Cart & Checkout	Cart sidebar, checkout form, coupon apply, order save to localStorage
Phase 9	Language System	EN/UR/AR toggle — all visible text switchable, RTL layout support
Phase 10	Polish & QA	Responsive design, animations, cross-browser check, performance review

09 — DEPLOYMENT

- Static files only — no server, no backend, no database needed
- Hosting options: GitHub Pages (free), Netlify (free), Vercel (free), or cPanel shared hosting
- Domain: fitrahpk.co — already owned by client, just point DNS
- HTTPS: Automatic on Netlify/Vercel, or via Cloudflare proxy for cPanel
- No database setup required — localStorage handles all data client-side
- Future upgrade path: Replace localStorage with Firebase/Supabase for real backend + multi-device sync

10 — NOTES & CONSTRAINTS

- localStorage is browser-specific — data does not sync across different devices
- For real multi-device e-commerce with payments, a backend will be needed (Phase 2 upgrade)
- Payment integration (JazzCash, EasyPaisa) can be added in Phase 2 as API calls
- All content (products, blogs, settings) fully editable from Admin Panel — no code needed
- Website fully responsive — optimized for mobile, tablet, and desktop
- Trilingual support — all visible text switchable between English, Urdu, and Arabic

- RTL layout auto-applied for Arabic and Urdu language selections
 - Islamic content is curated and accurate — Hadith references verified before inclusion
-

FITRAH

Beard is a Sunnah — Not a Trend.

Prepared for Fitrah PK — fitrahpk.co — April 2026
